

Installation Instructions

For Part Numbers:

250-253C 700-495 Airaid Oiled Media Filter

251-253C 701-495 SynthaMax Dry Media Filter - Red

252-253C 702-495 SynthaMax Dry Media Filter - Black

253-253C 703-495 SynthaMax Dry Media Filter - Blue

2009-14 Cadillac CTS-V 6.2L

2011-15 Cadillac CTS-V Coupe 6.2L

Component Identification

1.	Airaid Premium Filter	1
2.	Airaid Intake Tube	1
3.	MAF Panel	1
4.	Rear Panel	1
5.	Adapter Panel	1
6.	Top Cover	1
7.	OEM Cover Bracket	1
8.	Filter Adapter	1
9.	GM Coupler	1
10.	Silicone Hump Hose	1
11.	Weather Strip 9 3/4"	1
12.	6-32 x 5/16" Phillips Head Screw	8
13.	6-32 Kep Nut	8
14.	#6 Flat Washer	8
15.	8-32 x 5/8" Button Head Screw	2
16.	#8 Split Lock Washer	2
17.	1/4-20 x 1/2" Button Head Screw	4
18.	1/4" Flat Washer	4
19.	1/4-20 x 1/2" Phillips Screw (Black)	4
20.	1/4-20 Serrated Nut	1
21.	5/16-18 x 3/4" Hex Bolt	1
22.	5/16" Flat Washer	1
23.	5/8" Well Nut	1
24.	Grommet	1
25.	#140 PVC Fitting	1
26.	#64 Hose Clamp	2
27.	Bracket	1
28.	Rubber Edge Trim 8"	1
29.	5/8" Hose Fir Tree Anchor	2
30.	Edge Clip Cable Tie	2
31.	68 Hose Clamp	1
32.	Airaid Decal	1

1. **Disconnect the negative battery cable.**
Remove the engine and shock tower covers by simply pulling up on them and sliding out from the vehicle. These will be reused later in step 14.

2. **A) Disconnect the Mass Air Flow (MAF) sensor. B) Disconnect the PCV breather line by depressing the 2 Grey buttons in the fitting and pulling.** Loosen the clamps securing the intake tube to the throttle body and airbox and remove the factory intake tube.

3. **A) Remove the factory fender bolt securing the airbox assembly.** Next pull out the coolant line from atop the airbox lid and gently rotate the airbox assembly towards the front of the vehicle. The airbox assembly is now free and should be removed from vehicle.

4. Use caution not to loose the factory core support grommet while removing the airbox assembly. It will be used in step 11.

5. Install the Adapter Panel (#5) to the MAF Panel (#3) as shown using four 6-32 screws (#12), 6-32 Kep nuts, and #6 flat washers (#14). Attach the Rear panel (#4) to

6. Attach the OEM Cover Bracket (#7) to the Rear Panel a shown using the remaining two sets of 6-32 hardware.

7. Attach the 5/8" Well Nut (#23) to the vertical MAF Panel tab as shown using the 5/16 Hex Bolt (#21) and the 5/16" flat washer (#22).

8. **A) Install the Filter Adapter onto the MAF panel using three 1/4-20 Button Head screws (#17) and 1/4" Flat washers (#18). B) Attach the Weather Strip (#11) to the curved edge of the MAF Panel. C) Insert the 5/8" hose anchors (#29) into the two horizontal tab holes on the MAF panel**

9. **A) Transfer the Mass Air Flow sensor from the Factory airbox assembly into the Airaid Intake Tube (#2). Secure to the tube by using the 8-32 screws (#15) and #8 lock washers (#16). B) Install the GM Coupler (#9) on to throttle body side of the intake tube. C) Install the Hump Hose (#10) on the filter side of the intake tube as shown. D) Insert the Grommet (#24) into the hole in the Airaid Intake Tube and then follow by inserting the barbed end of the PCV Fitting (#25) into the Grommet. Apply the Airaid Bubble Decal onto the Intake Tube as shown.**

Refer to the Exploded View Drawing for additional information on part locations and orientations.

10. Install the Bracket (#27) on to the Rear Panel (#4) as shown using one 1/4-20 Button Head Screw (#19), 1/4" Flat Washer (#18), and 1/4" Serrated Nut(#20). Complete the assembly by attaching the Airaid Premium Filter (#1) to the Filter adapter (#8).

11. **A)** Locate and remove the Factory Ground strap bolt in the chassis. **B)** Lower the Airaid Performance Airbox assembly into the engine cavity. Insert the Well Nut into the Factory core support grommet and rotate the assembly rearward until the bracket rests on the shock tower and the MAF panel's lower tab hole is lined up with the Chassis bolt hole. Secure the assembly by re-using the factory 6mm Chassis Bolt.

12. Install the Airaid Intake Tube (#2) assembly onto the filter Adapter first, and then onto the throttlebody. Adjust for fit, and tighten all 3 hose clamps. Next reconnect the MAF sensor and Breather line. Slide the Edge Clip Cable Ties (#30) about 6" apart along the fender pinch weld and return the coolant line to its original location. Secure the coolant line using the cable ties and trim off excess.

13. **A)** Attach the Edge Trim (#27) on the Cover (#6) as shown and install the cover using the four Black 1/4-20 Phillips Head Screws. **B)** Line up the Bracket with the fender bolt hole and secure using the factory hardware. **Note:** Steps must be performed in order to avoid difficulty with aligning bolt holes.

14. Reinstall the Factory engine and shock tower covers.

15. Double check your work!

Make sure there is no foreign material in the intake path. Make sure all clamps, hoses, bolts, and screws are tight. Double check the hood clearance.

Reconnect the negative battery cable!

Thank you for purchasing the Airaid Intake System. Contact Airaid @ (800) 498-6951 8:00 AM - 5:00 PM MST weekdays for questions regarding fit or instructions that are not clear to you. Your Airaid Intake System was carefully inspected and packaged. Check that no parts are missing, or were damaged during shipping. If any parts are missing, contact Airaid. The air filter element is protected from direct exposure to water and debris; care should be taken not to drive through deep water. WATER INGESTION IS THE DRIVERS RESPONSIBILITY! The air filter is reusable and should be cleaned periodically.

FILTER IDENTIFICATION

700-495 Airaid Oiled Media
702-495 Airaid SynthaMax Dry Media - Black

701-495 Airaid SynthaMax Dry Media - Red
703-495 Airaid SynthaMax Dry Media - Blue

For your Oiled media filter we suggest using the AIRAID Filter Tune-Up Kit!

P/N 790-551 Aerosol Spray
P/N 790-550 Squeeze Spray

SynthaMax

Do Not Oil

Synthamax Air Filters do not require oil. Service air filter as needed by cleaning with common non-petroleum all-purpose household cleaner and water. Simple Green®, Formula 409® or equivalent works great. Apply cleaner to outside of air filter and allow to soak. Then flush filter clean from the inside out with a garden hose and repeat steps if necessary. Do not apply high pressure water or air to clean filter. Allow filter to air dry and reinstall.
